

Install SapEM to Your Home Screen

Get one-tap access to your dashboard

SapEM works like an app on your phone. Add it to your home screen once and you'll get a full-screen icon that opens straight to your dashboard — no browser bars, no typing the address every time. Sign in once first, then add the app to your home screen.

iPhone / iPad (Safari)

1. Open concept-solid.com/sapem in Safari. (It has to be Safari — Chrome on iPhone can't add to your home screen.)
2. Tap Login in the top right corner and sign in to your SapEM account.
3. Tap the Share icon in the toolbar (the square with an arrow pointing up).
4. Scroll down the share menu and tap "Add to Home Screen."
5. Confirm the name and tap "Add" in the top right. The SapEM icon will appear on your home screen.

Double-check: on newer versions of iOS, the "Add to Home Screen" screen shows a toggle or checkbox for opening the site as a web app (sometimes labeled "Open as Website App"). Make sure that's checked — it's what makes SapEM launch full-screen like a real app instead of opening inside Safari.

Android (Chrome)

1. Open concept-solid.com/sapem in Chrome.
2. Tap Login in the top right corner and sign in to your SapEM account.
3. Tap the three-dot menu in the top right corner.
4. Tap "Add to Home screen" (sometimes shown as "Install app").
5. Confirm by tapping "Add" or "Install." The SapEM icon will appear on your home screen.

Double-check: if Chrome shows an option to "Open as window" or asks you to confirm it as an app rather than a bookmark, make sure that's selected. That's what makes SapEM launch full-screen like a real app instead of opening a regular browser tab.
